## Treetops Lodge & Wilderness Experience ROTORUA, NEW ZEALAND

Take a **new** walk on the wilderness side

Between December and February this summer, share complimentary guided walks in the magnificent 800-year native forests and valleys of this 2,500-acre secluded wilderness. These hosted walks all introduce the ultimate in spectacular scenic views, ancient rainforests, waterfalls, lake and trout-stream visits.

Right in the heart of the Rotorua region, New Zealand's famous therapeutic thermal and trout-fishing capital, these walks are a privileged personal experience. Over 99% of native trees, bushes and tree ferns are evergreen and found nowhere else on Earth, and because many areas of the estate have never been developed, there is a rich bird life to be experienced.

Every guest also receives a map with guides to extensive safe, self-guided walks that helpfully identifies native birds and introduced animals you might see. With seven trout fishing streams, four lakes, riding, mountain-bike expeditions and over 70 kilometres of hiking or walk trails, Treetops offers every guest a **new** unforgettable walk – and much more – on its wilderness side.
